**RE: FINAL SUPPLEMENTAL WORK PLAN BUILDING 517 (CCDFT038)
CLEANUP AND COMPLIANCE PROJECTS 2013 CONTINUATION
FORT BUCHANAN, GUAYNABO, PUERTO RICO**

Dear Mr. Negrón,

The U.S. Environmental Protection Agency (EPA), has completed the review of the June 2015 Final Supplemental Work Plan (Supplemental Work Plan) for Building 517 in Fort Buchanan, Guaynabo, Puerto Rico. The Supplemental Work Plan details the removal of soil, confirmatory sampling, and reporting associated with excavation of contaminated soil at the former Building 517 (CCFTB-038), also referred as the Light Pole Site.

EPA considers that the Supplemental Work Plan is acceptable and concur with the approach proposed to address soil contamination at the Site. If you have any questions regarding this matter, please contact geologist David N. Cuevas at (787) 977-5856 or through electronic mail at cuevas.david@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "David N. Cuevas", is placed below the word "Sincerely".
